

ANGELO DI MARZIO

Head of Cybersecurity Development

With over 16 years of coding experience in different sectors, I developed strong technical expertise in multiple vertical applications, from app/web design to cybersecurity development, to secure coding and secure infrastructure design. Besides coding, leading a multidisciplinary team in developing complex projects and products is what I am truly passionate about: we face the constant pressure of internal and external stakeholders with cohesion and positivity, and we reach our goals as a team. I am also a heavy AI user: I lead Telsy's AI team and work across the whole stack, from model creation and fine-tuning to RAG systems and AI agents.

Work History

Head of Cybersecurity Development

Telsy S.p.A. (TIM Group) Rome · Jun 2022 - present

- Lead developer and coordinator of a multidisciplinary team of full-stack developers, DevOps and AI devs, OSINT analysts, UX/UI designers, test and validation engineers;
- Lead of the AI team: model creation and fine-tuning, RAG systems, AI agents and architectures for dynamic model serving;
- Design, engineering and implementation of proprietary cybersecurity solutions — Mobile Security, AI-based Decision Intelligence, Cyber Threat Intelligence — for governmental institutions and private customers;
- Management of internal stakeholders across the entire product life-cycle and active support of the sales unit for product demos and technical meetings

Head of Cyber Analysis Department

Cy4gate S.p.A. Rome · Jan 2019 - May 2022

- Lead developer and coordinator of the Offensive Security Division and of the Decision Intelligence product development for national and international governmental institutions and security agencies;
- Coordinating the development of offensive and defensive cybersecurity tools for iOS, Android, Windows and macOS;
- Coordinating the OSINT department, developing automated AI-based intelligence solutions

Team Leader Full-Stack Development

Cy4gate S.p.A. Rome · Jan 2018 - Jan 2019

- Team leader of the development unit, in charge of architectural development (front-end and back-end) and CI/CD workflow of a Real Time Analytics platform;
- Security best practices and secure coding at all stages of the product development lifecycle

Team Leader Front-End Development

Open Reply Rome · Feb 2016 - Jan 2018

- Managed the front-end team with agile methodology: hybrid and web apps for Alleanza, Generali, Banca Fideuram, Luxottica, the Italian Revenue Agency and Regione Lombardia;
- Ionic Framework in Angular and Vanilla JavaScript, HTML and CSS; coordination of UX/UI teams

Web Developer / Designer

Iperdesign Nov 2012 - Jan 2016 · **TimmyTag** Jul 2011 - Oct 2012 · **Freelance** 2008 - 2011

- Continuous collaboration with customers to translate their needs into app flow and behavior;
- Web UI design with UX/UI designers, including animation design, and front-end/back-end development in JavaScript/HTML and PHP

Skills

Product and project management

Agile methodology

16+ years of coding in: Angular, JavaScript, TypeScript, HTML/5, CSS/3, Node.js, PHP, jQuery, Docker, NGINX, PostgreSQL, MySQL, bash script

AI engineering: model creation and fine-tuning, RAG systems, AI agents, dynamic model serving

Expertise in W3C protocols, cross-browser development and responsive web design

Other programming languages: Python, React.js, React Native, GoLang, Rust

Soft Skills

Leadership · Empathy · Team working · Time management · Stakeholder management · Effective communication · Strong work ethic

Education

Lecturer of "Cybersecurity Landscape and AI Threats" — Master Degree Course in International Relations, LUISS "Guido Carli", 2025-2026

Bachelor Degree in Computer Science for Digital Businesses, Università Telematica Pegaso, July 2026

High School Diploma in Computer Science, ITIS G.B. Pentasuglia, Italy, 2009

ENGLISH ★★★★★

Hobbies

I played Waterpolo for over a decade at a professional level and now I enjoy coaching, teaching and mentoring kids to develop their own skills, for both sports and coding.
